INTUITIVE SKIN CARE

COMING NOVEMBER 6, 2008

XanGo's DNA is all about discovery. XanGo exists because of Joe's story. Living in Malaysia, Joe Morton experienced the amazing superfruit Mangosteen. Powered by his belief and dream, he had a glimpse of the future. A glimpse where a fruit would create a category, move an industry and change lives around the world. Joe's story, his glimpse, led to the realization of a dream – for XanGo, for you, for me, and for millions worldwide.

The trend across the world is wellness. XanGo, the world category creator of the whole fruit Mangosteen juice now brings its power of health and wellness to skincare with Glimpse Intuitive Skin Care. Once again, XanGo is first to market, delivering the power of the mangosteen to a cellular level for the skin. Glimpse features a phytonutrient rich xanthone formulation developed by XanGo through scientific exploration and advanced skin nutrition technology. Glimpse is designed to intelligently nourish and repair your skin with a unique and natural approach that will lead the industry of wellness. Intuitive skin care that knows what your skin needs.

XanGo has recruited some of the most prized skin care experts to work for you. This team's collective expertise and years of experience led to the creation of our superior xanthone rich formulas. We have gone to the ends of the earth, traveling thousands and thousands of miles to exotic Thailand where our nutrient rich Mangosteen is harvested. The pericarp peel then travels to the ancient island of Japan accessing legendary scientific technology bringing you the very best in skin nutrition. Glimpse,

infused with the secret of xanthenes, features BioActive X³ our new scientific discovery with 3 patent pending processes, and just like our juice, is first to market. Its powerful life force brings vital activity and energy to your skin delivering xanthenes to the cellular level stimulating collagen to maximize your skin health. BioActive X³ is cultivated in Japan through an innovative bio-fermentation process of the Mangosteen pericarp peel. This amplifies its purity, potency, and energy far beyond traditional scientific processes, multiplying the xanthone efficacy. Men and women alike will discover the superior benefits of skincare infused with our BioActive xanthenes. The science rivals any available in the world. What we have is a unique combination of a product that is performance driven and yet incredibly green and clean. It is exclusively yours through Glimpse, Intuitive Skin Care.

Beauty from within

Glimpse has been meticulously formulated to encompass pure botanical ingredients. To realize its full strength, 100% of the water in Glimpse is Mangosteen concentrated water infused with pure Mangosteen pericarp peel during the first step of the formulation process. We use a gentle cold bio-fermentation process, which very few companies make that level of investment in their product. This process allows a gentle transfer of all the nutrients in the fruit. The result is a partnering between potent and powerful green, pure, whole nutrients and an experience that is luxurious and of the highest quality.

Glimpse, Intuitive Skin Care, with our scientific blend of exclusive xanthone complexes from our mangosteen, BioActive X³, helps naturally renew, repair, and resist skin damage.

The BioActive x3 complex supercharges the cells and then gives them gas. The pericarp oil is an incredible technology because it solves one of the major troubles in skin care...getting nutrients to the cells. The pericarp oil is a breakthrough delivery system by which these nutrients reach the cells. Most skin care is an artificial effect on the surface of the skin. Glimpse is driven from within as it renews and awakens the cells and causes the skin cells to behave young again.

There is nothing added as fluff, fillers, or fragrance to make it have an artificial effect on the surface and just feel nice. Every ingredient is at active levels and is put in to Glimpse for a healthy skin benefit.

We are what we eat, drink, breathe, and absorb. People are realizing the dangerous effects of toxins and allergens hiding everywhere.

Glimpse is an important, common sense approach to deliver whole food nutrition for your skin. This is giving back to your skin (like going to the spa), with nutrients that restore, rebuild, and reawaken. Healthy Aging is no longer just a hope or dream.

Healthy, energized skin begins with a daily regimen designed specifically for your individual complexion needs. Our Glimpse brand will provide two skin care regimens. System I for normal to dry skin provides a creamy cleanser, a topical xanthone spray, a nutritious xanthone serum, and a rich xanthone moisturizing cream. System II for normal to combination skin includes a refreshing gel cleanser, a topical xanthone spray, a nutritious xanthone serum and a moisturizing xanthone lotion. All feature the powerful BioActive X³ Complex. Both systems work synergistically with XanGo Juice and 3SIXTY5 delivering internal and external wellness. We have created a new category of topical supplementation that is matched only by our industry changing internal supplementation.

With the Glimpse VIP program you will be allowed to purchase Glimpse in October before the launch in November at the International Convention. There you can join us in the Glimpse Holistic Spa where you will be the first in the world to discover the anti-aging secret of our dynamic blend of Mangosteen and exotic phytonutrients delivering luminosity to your skin. Experience the touch, smell and feel of your industry changing XanGo skin care brand.

XanGo already dominates the category of mangosteen with 80% worldwide marketshare. We are just beginning to expand upon the power and healthy benefits of our superfruit, Mangosteen.

I believe this is bigger than all of us. It's an honor to create greatness with all of you through XanGo. I am grateful for each and every one of you. XanGo has a high energy, high emotional billion dollar brand to serve you. Glimpse your future as together we dominate the Mangosteen category. For you see, we are just beginning.
